POTOMAC TO HELP AMERICAN BUSINESS DEVELOPMENT OVERSEAS

Washington, DC - Over the last 9 years we have seen unprecedented spending in the Middle East by the US Government on US Companies to support our troops. Iraq and Afghanistan alone have seen over 100 Billion dollars spent on US contractors.

Turkey 1.7 Billion,

Jordan 1.5 Billion,

Saudi Arabia 5.1 Billion,

Qatar 3.1 Billion

UAE 3.9 Billion,

Oman 900 Million,

Kuwait 23 Billion,

Pakistan 1.7 Billion,

Tajikistan 100 Million,

Uzbekistan 300 Million, and

Turkmenistan 300 Million.

Recent changes to defense contracting regulations and host nation laws now require US companies to register and obtain a business license in order to operate in these countries.

Potomac Strategic is proud to announce an expansion in its services to both its current clients and future ones. We have aligned with strategic partners in the region to formally register US Defense Contractors and Commercial companies alike with each country's respective Ministries of Trade and Ministries of Interior to properly acquire an operating license in that country.

Obtaining a business license in these countries is a requirement both by local law and US Department of State practice. You may have already found and seen requirements from the US Government which require you to submit a copy of your business license in that country with your proposal. Potomac Strategic is well positioned to support you in not only winning the business, but meeting the requirements of obtaining a business license in these countries. To date we have been able to properly register over a dozen companies in Iraq and Afghanistan alone. All of whom have gone on to win significant contracts in both Iraq and Afghanistan.

If you are interested in establishing yourself in these countries and winning work with the US Government then don't hesitate to contact us.
